	<p>CO₂ Carbon dioxide</p>
<p>Concentration in atmosphere: 383,900,000 ppt</p>	<p>Global Warming Potential (GWP): 1</p>
<p>CFC Molecules</p> 	<p>CFCs Chlorofluorocarbons</p>
<p>Concentration in atmosphere: 392 ppt</p>	<p>Global Warming Potential (GWP): 7,825</p>

Check all of the boxes that apply to your gas after each ‘B’ statement is read.

- You are a greenhouse gas.
- You make up more than 15% of the atmosphere.
- You are a naturally-occurring gas.
- You are a naturally-occurring, human-influenced gas.
- You are a human-made gas.
- You are increasing in concentration.
- You are a by-product of traditional energy production (coal-fired power).
- Once emitted into the atmosphere, you will remain there for more than 50 years.
- You can be used as an energy source.
- You are a “bad” gas.

Check all of the boxes that apply to your gas after each ‘B’ statement is read.

- You are a greenhouse gas.
- You make up more than 15% of the atmosphere.
- You are a naturally-occurring gas.
- You are a naturally-occurring, human-influenced gas.
- You are a human-made gas.
- You are increasing in concentration.
- You are a by-product of traditional energy production (coal-fired power).
- Once emitted into the atmosphere, you will remain there for more than 50 years.
- You can be used as an energy source.
- You are a “bad” gas.

	<p>HFCs Hydrofluorocarbons</p>
<p>Concentration in atmosphere: 26 ppt</p> <p>Global Warming Potential (GWP): 5,920</p>	
	<p>CH₄ Methane</p>
<p>Concentration in atmosphere: 392 ppt</p> <p>Global Warming Potential (GWP): 25</p>	

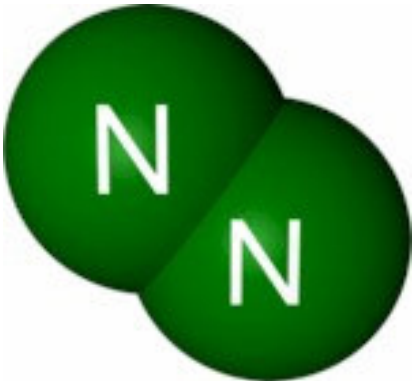

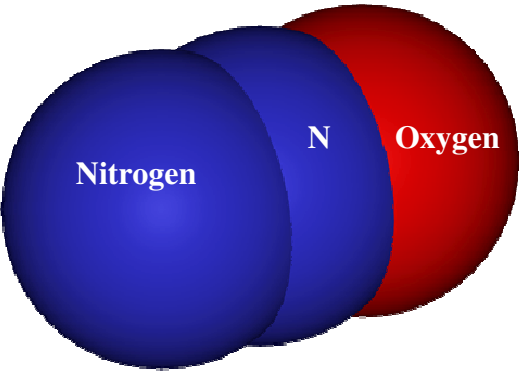

Check all of the boxes that apply to your gas after each ‘B’ statement is read.

- You are a greenhouse gas.
- You make up more than 15% of the atmosphere.
- You are a naturally-occurring gas.
- You are a naturally-occurring, human-influenced gas.
- You are a human-made gas.
- You are increasing in concentration.
- You are a by-product of traditional energy production (coal-fired power).
- Once emitted into the atmosphere, you will remain there for more than 50 years.
- You can be used as an energy source.
- You are a “bad” gas.

Check all of the boxes that apply to your gas after each ‘B’ statement is read.

- You are a greenhouse gas.
- You make up more than 15% of the atmosphere.
- You are a naturally-occurring gas.
- You are a naturally-occurring, human-influenced gas.
- You are a human-made gas.
- You are increasing in concentration.
- You are a by-product of traditional energy production (coal-fired power).
- Once emitted into the atmosphere, you will remain there for more than 50 years.
- You can be used as an energy source.
- You are a “bad” gas.

Air & Energy Audit – APPENDIX – GAME CARDS

	<p>N₂ Nitrogen</p>
<p>Concentration in atmosphere: 780,800,000,000 ppt</p> <p>Global Warming Potential (GWP): 0</p>	
	<p>N₂O Nitrous oxide</p>
<p>Concentration in atmosphere: 321,000 ppt</p> <p>Global Warming Potential (GWP): 298</p>	

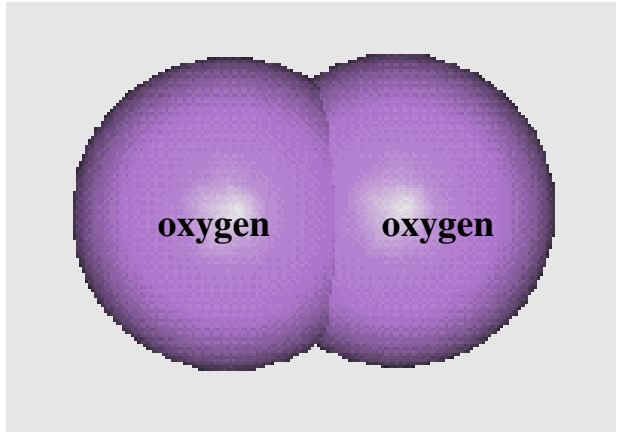

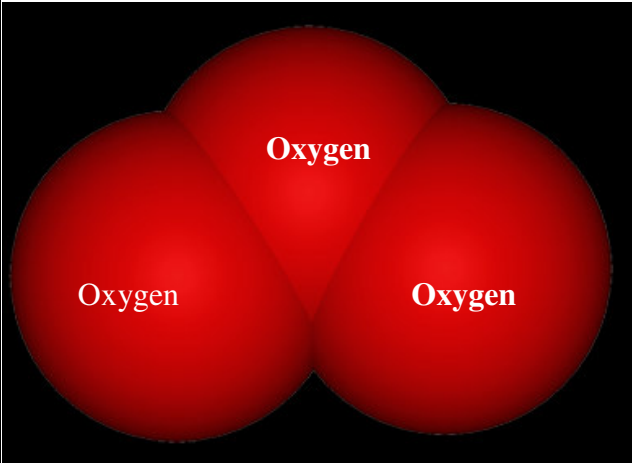

Check all of the boxes that apply to your gas after each ‘B’ statement is read.

- You are a greenhouse gas.
- You make up more than 15% of the atmosphere.
- You are a naturally-occurring gas.
- You are a naturally-occurring, human-influenced gas.
- You are a human-made gas.
- You are increasing in concentration.
- You are a by-product of traditional energy production (coal-fired power).
- Once emitted into the atmosphere, you will remain there for more than 50 years.
- You can be used as an energy source.
- You are a “bad” gas.

Check all of the boxes that apply to your gas after each ‘B’ statement is read.

- You are a greenhouse gas.

- You are a naturally-occurring gas.
- You are a naturally-occurring, human-influenced gas.
- You are a human-made gas.
- You are increasing in concentration.
- You are a by-product of traditional energy production (coal-fired power).
- Once emitted into the atmosphere, you will remain there for more than 50 years.
- You can be used as an energy source.
- You are a “bad” gas.

Air & Energy Audit – APPENDIX – GAME CARDS

	<p>O₂ Oxygen</p>
<p>Concentration in atmosphere: 209,500,000,000 ppt</p> <p>Global Warming Potential (GWP): 0</p>	
	<p>O₃ Ozone</p>
<p>Concentration in atmosphere: 34,000 ppt</p> <p>Global Warming Potential (GWP): Positive value (but cannot be calculated)</p>	

Check all of the boxes that apply to your gas after each ‘B’ statement is read.

- You are a greenhouse gas.
- You make up more than 15% of the atmosphere.
- You are a naturally-occurring gas.
- You are a naturally-occurring, human-influenced gas.
- You are a human-made gas.
- You are increasing in concentration.
- You are a by-product of traditional energy production (coal-fired power).
- Once emitted into the atmosphere, you will remain there for more than 50 years.
- You can be used as an energy source.
- You are a “bad” gas.

Check all of the boxes that apply to your gas after each ‘B’ statement is read.

- You are a greenhouse gas.
- You make up more than 15% of the atmosphere.
- You are a naturally-occurring gas.
- You are a naturally-occurring, human-influenced gas.
- You are a human-made gas.
- You are increasing in concentration.
- You are a by-product of traditional energy production (coal-fired power).
- Once emitted into the atmosphere, you will remain there for more than 50 years.
- You can be used as an energy source.
- You are a “bad” gas.

	<p>SF₆ Sulfur hexafluoride</p>
<p>Concentration in atmosphere: 6.5 ppt</p> <p>Global Warming Potential (GWP): 23,900</p>	
	<p>H₂O Water</p>
<p>Concentration in atmosphere: Varies</p> <p>Global Warming Potential (GWP): Varies (cannot be calculated)</p>	

Check all of the boxes that apply to your gas after each ‘B’ statement is read.

- You are a greenhouse gas.
- You make up more than 15% of the atmosphere.
- You are a naturally-occurring gas.
- You are a naturally-occurring, human-influenced gas.
- You are a human-made gas.
- You are increasing in concentration.
- You are a by-product of traditional energy production (coal-fired power).
- Once emitted into the atmosphere, you will remain there for more than 50 years.
- You can be used as an energy source.
- You are a “bad” gas.
